construction chemicals

"Chosen by the best"

Tekno Yapı Kimyasalları A.Ş., which serves every region of Turkey effectively with latest technology factories in İstanbul, Kayseri, Afyon and Elazığ operates in construction chemicals sector. With its 500,000 tons/year production capacity and high product quality Tekno Yapı Kimyasalları A.Ş. is one of the leading companies in construction industry.

The experience and know-how achieved by co-operating with the world leader companies for many years is the motivation source of Tekno Yapı Kimyasalları A.Ş. In construction industry, new generation products developed in recent years have replaced with the traditional and classic adhesive, flooring, strengthening, repairing and water isolation products. Additionally, in paralel with progress in the building industry, a wide range of products have been introduced.

Studies are carried out by few specialized companies in this field in our country. At this point, Tekno Yapı Kimyasalları A.Ş. fills important gap for the solution of all kind of technical customer problems with its expert staff.

Tekno Yapı Kimyasalları A.Ş., which allocates significant resources to R&D activities continuously increases the variety of its products. R&D center located in İstanbul factory continues to realize many firsts in the sector with its expert engineers and chemists. Also many imported products have been localized in R&D center to provide substantial benefits to the Turkish economy.

Products are manufactured according to international quality standards in Tekno Yapı Kimyasalları A.Ş.'s facilities. They are subjected to the necessary tests from the first raw material entry to the final product quality control and the quality process continuity is guaranteed. The procedures defined within the framework of ISO 9001 quality management system are applied in all processes and relevant TSE, TSEK, CE and G quality certificates have gained for many products. After-sales technical support is given by the technical specialists in the fastest way.
